NOTE: CPU current/voltage monitoring (CPU_SENSE_I/CPU_SENSE_V) requires 100K/10uF RC filter at SMU pins. Caps should connect to GND SMU_AVSS. SMU_VREF should be same signal or reference used by monitoring circuit, but be aware that this will affect other analog inputs such as AC adapter ID.

NOTE: All analog inputs to SMU should have a 100pF capacitor to the SMU AVSS signal (GND_SMU_AVSS). None of those capacitors are provided on this page.

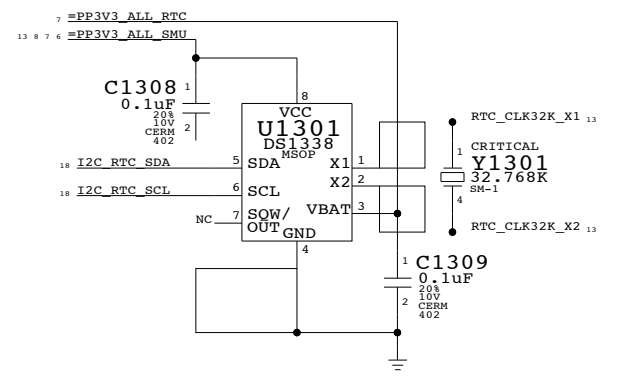

NOTE: Some primary and alternate functions require pull-ups that are not provided on this page. Please review the latest SMU specification to ensure missing pull-ups are provided on another page.

NOTE: Pinout matches SMU pinout v1.51.

Signal aliases required by this page:
 (NONE)

NOTE: This page is expected to contain the necessary aliases to map the USB pairs to their appropriate destinations and/or to properly terminate unused signals.

BOM options provided by this page:
 (NONE)

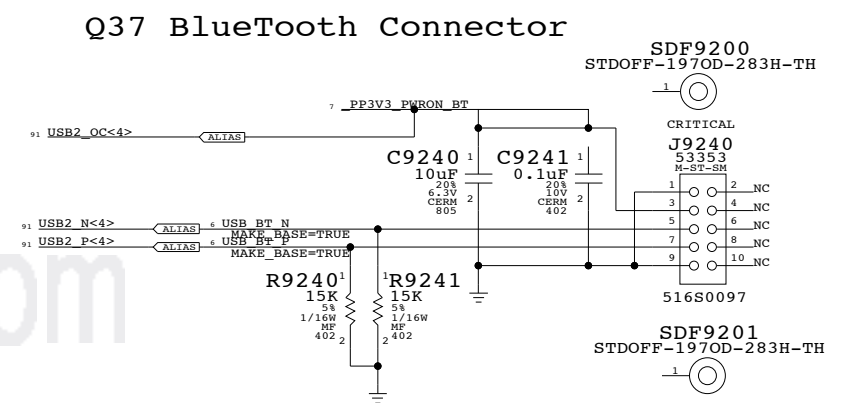

NOTE: USB pairs are NOT constrained on this page. It is assumed that the USB Host Controller page will provide the appropriate constraints to apply to entire USB D+/D- XNets.

neoBorg Implementation

NOTE: This design does not provide power control on USB ports 2-4. Rename USB controller outputs to indicate single-pin connections.
